

Amendments to the Claims:

1. (Original) A handbook comprising:
 - at least one generalized page; and
 - at least one specialized page;wherein the specialized page contains particular content to the specific use of the handbook,
wherein the generalized page is general to the use of the handbook,
wherein the specialized page is formed by at least a part of a printable sheet comprising:
 - an adhesive side with an adhesive layer on at least a part of the sheet; and
 - a printable side containing the particular content printed by a printing means, andwherein the at least one specialized page is formed by attaching at least part of the adhesive side of the printable sheet to at least one generalized page.
2. Original) A handbook as described in Claim 1, wherein the handbook functions as at least one of an official record and an indication of qualification.
3. (Original) A handbook as described in Claim 1, wherein two or more generalized pages are permanently bound together prior to attaching the at least one specialized page.
4. (Original) A handbook as described in Claim 2, wherein two or more generalized pages are permanently bound together prior to attaching the at least one specialized page.
5. (Original) A handbook as described in Claim 1, wherein the printable side of the printable sheet further comprises:
 - multiple printing spaces,wherein the multiple printing spaces form corresponding multiple pages of the specialized pages, and the adhesive layer is formed on at least a portion of back of one of the printing spaces.

6. (Original) A handbook as described in Claim 2, wherein the printable side of the printable sheet further comprises:

multiple printing spaces;

wherein the multiple printing spaces form corresponding multiple pages of the specialized pages, and the adhesive layer is formed on at least a portion of back of one of the printing spaces.

7. (Original) A handbook as described in Claim 1, wherein the printable side of the printable sheet further comprises:

multiple printing spaces; and

at least one fold line,

wherein the multiple printing spaces form corresponding multiple pages of the specified pages, and the fold line is disposed along a border between at least two of the printing spaces by which the printable sheet can be folded up into a concertina, and the adhesive layer is formed on at least a portion of the back of each of the printing spaces.

8. (Original) A handbook as described in Claim 2, wherein the printable side of the printable sheet further comprises:

multiple printing spaces; and

at least one fold line,

wherein the multiple printing spaces form corresponding multiple pages of the specified pages, and the fold line is disposed along a border between at least two of the printing spaces by which the printable sheet can be folded up into a concertina, and the adhesive layer is formed on at least a portion of the back of each of the printing spaces.

9. (Original) A handbook as described in Claim 1, wherein the printable side of the printable sheet further comprises:

multiple printing spaces,

wherein the at least one printing space is separable from the printable sheet, and the adhesive layer is formed on at least a portion of the back of each of the printing spaces.

10. (Original) A handbook as described in Claim 2, wherein the printable side of the printable sheet further comprises:

multiple printing spaces,

wherein the at least one printing space is separable from the printable sheet, and the adhesive layer is formed on at least a portion of the back of each of the printing spaces.

11. (Original) A handbook as described in Claim 9, wherein the printable surface of the printable sheet further comprises:

at least one perforated line disposed along the border between at least two of the printing spaces by which at least one of the printing spaces can be separated from the printable sheet.

12. (Original) A handbook as described in Claim 10, wherein the printable surface of the printable sheet further comprises:

at least one perforated line disposed along the border between at least two of the printing spaces by which at least one of the printing spaces can be separated from the printable sheet.

13. (Original) A handbook as described in Claim 5, wherein the size of the printing space is smaller than that of the generalized page.

14. (Original) A handbook as described in Claim 6, wherein the size of the printing space is smaller than that of the generalized page.

15. (Original) A handbook as described in Claim 7, wherein the size of the printing space is smaller than that of the generalized page.

16. (Original) A handbook as described in Claim 8, wherein the size of the printing space is smaller than that of the generalized page.

17. (Original) A handbook as described in Claim 9, wherein the size of the printing space is smaller than that of the generalized page.

18. (Original) A handbook as described in Claim 10, wherein the size of the printing space is smaller than that of the generalized page.

19. (Original) A handbook as described in Claim 11, wherein the size of the printing space is smaller than that of the generalized page.

20. (Original) A handbook as described in Claim 12, wherein the size of the printing space is smaller than that of the generalized page.

Claims 21 - 24 (Cancelled).

25. (New) A handbook comprising:

at least one generalized page general to the use of the handbook;

at least one specialized page containing particular content to the specific use of the handbook;

and

wherein at least one printed printable sheet is formed by printing particular content onto a printable sheet using a printing means,

wherein the printable sheet comprises:

an adhesive side having an adhesive layer on at least a part of the side;

a printable side; and

a detachable sheet removably attached to the adhesive layer,

wherein the at least one specialized page is formed by removing the detachable sheet from the at least one printed printable sheet and pressing the adhesive layer to the at least one generalized page in order to attach at least a part of the printed printable sheet to the generalized page.

26. (New) The handbook as described in Claim 25, wherein the handbook functions as at least one of an official record and an indication of qualification.

27. (New) The handbook as described in Claim 25, wherein the particular content is retrieved from a database; and

wherein the particular content is transferred to a printing means.

28. (New) The handbook as described in Claim 26, wherein the particular content is retrieved from a database; and

wherein the particular content is transferred to a printing means.
